A Look At The Line Lofts, Hollywood's Newest Architectural Gem

July 31, 2018
Alyssa Kuhlman

The Line Lofts is the latest sought-after address setting a new standard for sophisticated urban living in LA. Located just steps from Los Angeles' iconic Hollywood Boulevard, the six-story building features 82 exquisitely designed studios, one- and two-bedroom, pet-friendly residences with a modern classic flair.

Ranging from 415 to 1,477 square feet, each residence at The Line Lofts offers spacious and vibrant living quarters with 16- to 20-foot ceiling heights and a uniquely designed cubed patio created to seamlessly blend the transition between indoor and outdoor living. Architect Zoltan Pali, founder and principal at award-winning SPF: architects, conceived each home to optimize natural light and showcase the surrounding views spanning the Downtown and Westside skylines, as well as the nearby Hollywood Hills.

Designed to become natural extensions of each residence, The Line Lofts lobby and common areas provide flexible and functional creative spaces for residents to use and enjoy. Common areas include The Sky Lounge, a penthouse-level lounge with double height ceilings and windows framing unobstructed views of the city; The Retreat, an indoor/outdoor recreation center opening to the pool and spa deck, complete with a kitchen and lofted library; The Wellness Spot, a lobby-level gym; and ground-floor retail.

Many of the furniture pieces displayed throughout the building were sourced and designed by Los Angeles-based interior designer Gulla Jónsdóttir, creating sophisticated light and earthy retreat through elegant, neutral colors and soft textures. Each residence is available either fully or partially furnished or unfurnished with contemporary or modern furniture packages hand-selected by Gulla Jónsdóttir.

Rents range from \$2,500 to \$7,000 per month. To learn more about The Line Lofts, visit www.theline-lofts.com or call 323-870-6497.
